

The screenshot shows the USPTO Patent Search interface. At the top, there are buttons for 'Query', 'List', 'Browse', 'Queue', and 'Clear'. Below these, the 'Qry' field contains the search terms 'USPAT,US-PCPUB,EPO,JPO,IBM,TDB'. To the right, there are checkboxes for 'P: Purata' and 'P: Highlight all hit terms initially'. The 'Default operator' is set to 'OR'. The search results display shows a single entry: '(vacuum near2 amplifier) and ((grid or gate) with (adjustble or movable or movement or tunable))'. The bottom status bar shows '1/1' and '1/1'.
